To Whom It May Concern:

Working with the Kear Civil Corporation on the Western Valley Child Care Center was an outstandingly positive experience. Every aspect of their performance was exceptional.

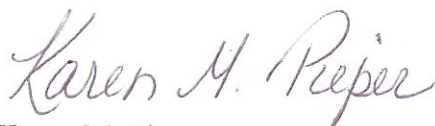

The Western Valley Child Care Center was a design build project. We enlisted the assistance of Kear in the preplanning design phase as well as contracting with them for the scope of all sitework, paving, and underground utilities – both on and offsite. Many of their insights into cost saving measures were incorporated into the final design.

Kear's execution of all their work reflects their professionalism. We encountered unexpected underground problems offsite and these were dealt with proficiently, including the timely and comprehensive paperwork for Change Orders, which is often overlooked.

Their overall and final product shows an element that I have not seen for many years. Kear Civil Corporation cares about quality and goes the extra distance to provide it. Our civil engineer was so impressed at the Final Punch that he requested their name and contact information for them, stating he would like to see them on other projects and wanted to refer them.

In addition to their professionalism and performance, Kear Civil Corporation is staffed with great people. From estimating to administration to their field personnel, everyone I have met and worked with has been personable, positive and accommodating.

I highly recommend Kear Civil Corporation to anyone with the foresight to enlist their services, and genuinely look forward to the next opportunity to work with them.
